2013 Survey on the Obstacles to Effective Business Meetings

572 North American business leaders address topic

In many organizations, business meetings consume a considerable amount of time on an executive's calendar. While business leaders rely on and embrace certain technologies such as smartphones and tablets, many face challenges when it comes to technology in meeting rooms, according to the 2013 Survey on the Obstacles to Effective Business Meetings.

The blind survey of 572 North American business leaders found that they face a myriad of challenges when using technology in meeting rooms – from having the right tools to collaborate with other meeting participants, to having the ability to share content from their preferred devices.

Room for Technology Productive meetings are more than having the right attendees and an effective meeting leader. Two-thirds of business leaders state having the right meeting room technology would make meetings more productive. 64% of business leaders state the meetings they attend would be more effective if they were able to view information on screen from more than one person at the same time. When thinking about their company's typical conference room presentation system, business leaders wished their company system... Had wireless/cable-less connectivity to the projector/LCD 50% Was easy to connect other/mobile devices Was easy to connect to/from participant's seat 38% Started-up quicker

Left to Their Own Devices

Even with the proliferation of smartphones and tablets, 62 percent of business leaders do not have a company-issued smartphone and even fewer, 21 percent, have a company-issued tablet.

Still more than two-thirds of business leaders state the ability to *easily* project content from those devices in meetings would be useful.

Meeting Challenges Persist

When thinking about the typical meetings they attend, respondents face a variety of challenges around participant engagement and technology, especially as it relates to sharing information or visuals. Business leaders rated the specific obstacles to holding a successful meeting accordingly:

Always a Often a Somet challenge challenge a chall		Never a challenge			
Participants distracted with emailing, texting, etc.					
7% 23% 34	4% 25%	6 12%			
Getting everyone to engage and	participate				
8% 22% 319	% 29%	10%			
Lack of preparation by the meeting participants					
6% 17% 36%	31%	11%			
Effectively sharing information/visuals during the meeting					
4% 11% 33%	39%	13%			
Technical issues when trying to show/share information					
5% 9% 33%	41%	12%			

Ready. Set. Meet.

According to business leaders, while a majority of meetings start on time, fewer end on time and even less have easy-to-use technology for presenters and participants.

When thinking about the meetings they attend:

Greater than 75%	51%-75%	26%-50%	10%-25%	Less than 10%			
Start on time							
40	%	25%	14%	13% 8%			
Have defined objectives							
36 %	6	28%	18%	12% 6%			
Include the right participants							
4:	3%	32	%	15% 6 [%] 4 [%]			
Have an agenda distributed in advance							
29%	22	% 18	% 12%	6 19%			
Effectively use technology so participants can collaborate*							
24%	23%	219	6 15%	6 17%			
Have easy-to-use technology for presenters and participants							
27%	259	% 2	24% 1	2% 13%			
End on time							
30%	:	28%	23%	11% 8%			
* e.g. easily share vi	suals/information	from different PCs	or tablets during	the meeting			

2013 Survey on the Obstacles to Effective Business Meetings

The Key to Collaboration

Forty-three percent of business leaders state their company's use of technology in meetings has increased during the past 12 months. However, they still point to a variety of technologies that would make meetings more productive. These include:

46%

Collaboration solutions that make it easy to share visuals/information

41%

Meeting software in which participants enter comments and ideas

39%

Video conferencing

39%

Web-based virtual meeting tools

27% Teleconferencing

19% Voting tools

TGIT

Everybody loves Fridays, but not when it comes to meetings. Almost 40 percent of executives responded that Tuesday meetings are the most effective.

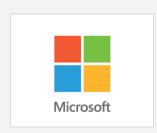

Monday	Tuesday	Wednesday	Thursday	Friday
23%	39%	24%	11%	3%

A League of Her OWN

Oprah Winfrey would do the best job at collaborating or engaging other participants during a business meeting when compared to other business executives, according to respondents. Microsoft's Bill Gates was a close second with Oracle's Larry Ellison finishing dead last.

21% Oprah Winfrey

18% Bill Gates

15% Sir Richard Branson

9% Mark Zuckerberg

14% Warren Buffet

8% Donald Trump

13% Tim Cook

2% Larry Ellison
